

WiCollab®

INSPECTRON
THE VISIONARY COMPANY

The **WiCollab®** is the companion application for the Inspectron's IOT connected tools the **WiTorch®** and the **WiScope®**.

Key Features

WiCollab® enables you to command your tools, view your tools video and store, manage and share your images and video. The **WiCollab®** sends HD images and video streams directly to Inspectron's **Wi Cloud®** storage (subject to subscription type).

Integrate into Other Third Party Software

Our SDKs, APIs and cloud services can be modified to integrate into 3rd party applications.

✓ Communicate in Real Time

WiCollab® can connect to your tools via P2P (point to point mode) or via WiFi for real time communication, sharing, videos, images, voice memo and collaboration (subject to subscription type).

✓ Industries and Use Cases

Our IOT connected range is ideal for several industries and use cases from automotive inspections, warranty orders and reports, to industrial and manufacturing machine maintenance and repair, to aviation, and oil and gas, the list is endless.

Identify leaks, scratches, signs of wear, and cracks by zooming in and out of the image, turning on the flashlight, or increasing brightness in dark areas.
